INSTALACIÓN CERTIFICADO USUARIO SISTEMA LINUX UBUNTU 17.10 Y POSTERIORES

1. Certificado electrónico - ¿cómo instalarlo?

a. Importación desde Google Chrome

Ir a las opciones/preferencias de Google Chrome:

Bajar hasta el final de la pantalla y seleccionar las opciones avanzadas:

← → C		☆ :		
Apps 👜 Tesoro PRO				
E Settings Q Search settings				
Search engine		*		
Search engine used in the address bar	Google 👻			
Manage search engines	•			
Default browser				
Google Chrome is your default browser	Google Chrome is your default browser			
On startup				
Open the New Tab page				
O Continue where you left off				
Open a specific page or set of pages				
Advanced 👻				

Y acceder a la Gestión de certificados:

Settings	× 💶		8 • • •
\leftarrow \rightarrow C \odot Chrome	chrome://settings		☆ :
👖 Apps 🗅 Tesoro PRO)		
≡ Settings	Q Search settings		
	Automatically send some system information and page content to Google to help detect dangerous apps and sites		•
	Protect you and your device from dangerous sites		
	Automatically send usage statistics and crash reports to Google		
	Send a "Do Not Track" request with your browsing traffic		
	Use a web service to help resolve spelling errors Smarter spell-checking by sending what you type in the browser to Google		
	Manage certificates Manage HTTPS/SSL certificates and settings	•	
	Content settings Control what information websites can use and what content they can show you	Þ	
	Clear browsing data Clear history, cookies, cache, and more	Þ	
	Passwords and forms		
	Autofill settings Enable Autofill to fill out forms in a single click	•	Ţ

Al pulsar sobre la Gestión de Certificados se abrirá el gestor de certificados:
